

Last October, we had the opportunity to visit Denmark!

This is a real chance both for the discovery of another culture and the reinforcement of a foreign language.

It was a very good experience. We were able to improve our English and discover a new country which is very different from France. School habits differ from ours. In Denmark, students are more free and independent. The schedules are not the same either. The days are shorter because there are fewer breaks. Ordrup is really big and beautiful. We found the Danish teaching methods great. They often work in groups and don't spend as much time as us sitting on chairs!

We could visit many touristic places, Copenhagen is quite a big city. There are lots of churches. This is a clean, calm and ecologically friendly capital that is very advanced in new technologies and learning methods.

We have also noticed Danish people are very nicely dressed!

Special thanks to Mathilde Nelman Jensen and Sophie Dahl Relster for welcoming us!

Thanks to Christopher Bisgaard Olesen and Ordrup Gymnasium for having permitted this exchange and for having welcomed us so nicely!

Clara Bernier and Emma Habki
